

2021 SEED GUIDE

The 2021 Seed Guide is now available to download off our website. Head over to lincolnrural.com.au - go to the side panel, click on PRODUCTS, then click on SEEDS . At the bottom of the page you will see the Seed Guide to download. Copies also available in store.

For more information or to place an order please contact our Agronomy team.

While you are there check out our online store.

INFORMATION SESSION

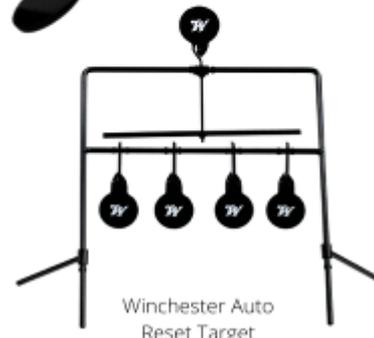

WINCHESTER TARGETS

SAVE THE DATE!

Lincoln Rural will be holding a Grower Information Session on Thursday 11th March.

Hear the latest information on pre-emergent and slug control plus lots more.

A time and location is still to be advised. So be sure to check in store and on social media for further information.

SEED TREATMENTS

Seed treatments play a crucial role in providing protection for the seed and seedlings against pre and post emergent insects and disease pressures. Using both fungicide and insecticide seed treatments will help protect against early season pests and allow for the greatest potential return at the end of the season.

Systiva® Seed Treatment Fungicide	
Barley	
150 mL/100kg seed	
Control	Suppression
Loose smut	Rhizoctonia
Powdery mildew	
Net form of net blotch	
Scald	
Spot form of net blotch	
Leaf rust	
Bunt	
Wheat	
150 mL/100kg seed	
Control	Suppression
Bunt	Rhizoctonia
Septoria tritici blotch	

Systiva® is a fungicidal seed treatment made by BASF that offers a wide range of protection against key soil-borne, seed-borne and foliar diseases in barley. Systiva® is the first seed treatment that controls all major foliar as well as seed-borne and soil-borne diseases in barley. That combination of comprehensive and long-lasting protection has the potential to reduce in-crop diseases and sets up the likelihood of stronger yields. It is also registered for control of Septoria tritici blotch and bunt in wheat which makes it a valuable rotational option for wheat. Due to the potential of disease resistance, a foliar fungicide is recommended to be applied following the use of Systiva®. Systiva® should be used as part of an integrated resistance management program that includes:

- **Avoid using Systiva® two years in a row**
- **Use foliar fungicides with other MOAs**
- **Use resistant varieties**
- **Adequate crop rotations**
- **Effective stubble management**

Gaicho® 600 Red Flowable Seed Treatment Insecticide	
Cereals	
120 or 240 mL/100 kg seed	
Russian wheat aphid and corn aphid feeding damage	
Spread of barley yellow dwarf virus	
120 mL/100 kg of seed	
<i>Protection against insect pests of stored grains:</i>	
Granary weevil	
Indian meal moth	
Lesser grain borer	
Rice weevil	
Rust-red flour beetle	
Saw-toothed grain beetle	
Tropical warehouse Moth	

Gaicho® 600 has built a strong reputation as a seed treatment of choice, protecting crops at the crucial establishment phase from a range of early season chewing and sucking pests. What many growers have also noticed is that Gaicho protected crops look healthier and stronger. This is because the active ingredient in Gaicho has been found to provide protection against abiotic stress in some situations. We have called this side-effect Stress Shield™. It offers reliable early season insect control with the added benefit of the protective Stress Shield™ effect, which may increase crop vigour and reduce abiotic stress pressures like drought and water logging. With Russian wheat aphid becoming more prevalent on the Eyre Peninsula, Gaicho 600® cuts down on your need to spray, protecting the environment and allowing beneficial species to flourish unharmed.

FIRE FIGHTER SPECIAL

Davey Single Impellor Firefighter with Honda GX160 5.5hp Motor

NORMAL PRICE: \$899.00 inc. GST

SUPPLAMINS

Supplamins Loose Licks, not just for lambing! Alltech's *Supplamins MidMag* is a perennial favourite to fix problems over lambing BUT wait, there's more!

A budget joining lick

Supplamins Pasture Boost has been formulated to target cattle and sheep grazing on pasture that is declining in nutritional value. Blended with minerals, vitamins and trace elements, **Supplamins Pasture Boost** provides cattle and sheep with the daily levels they require for growth, performance, reproduction and maintenance. **Supplamins Pasture Boost** has been formulated containing Bovatec®, a feed additive to help optimise feed efficiency on grazing pastures for ruminant animals. *Ideal for joining.*

Optimize the use of your stubbles

Supplamins Dry Feed Lick provides cattle and sheep with a specific NPN protein source to help improve forage utilisation. Combining protein with essential minerals, trace elements and vitamins, **Supplamins Dry Feed Lick** provides cattle and sheep with the daily levels they require for growth, performance, reproduction and maintenance when grazing dry pastures or stubble. *Perfect for summer.*

WATERBOY SOLAR PUMPS

**Windmill not working? Calm Weather so NO Water?
Time to consider replacing (or adding to your water
system) a Waterboy Solar Pump !!**

Tailoring the right water system for your property is not always easy. That's where our team at Lincoln Rural can offer expert advice on sourcing, moving and storing your precious resource.

Waterboy Solar Pumping systems offer you the option of moving your water utilising solar power. It is a very cost effective and efficient way of helping you drought proof your property. We stock a large range of Waterboy Solar pumping systems and accessories. Need help with Installation - not a problem. We can organise this as well.

NEW BLUNDSTONE STYLE

Blundstone styles 600 (Brown) & 610 (Black) are a direct upgrade from their original 500 & 510's. They are leather lined, soft toe, premium boot with herringbone elastic sides with a less heavy duty sole that has heel cushioning. These boots are suitable for children and adults and we are stocking sizes 3.5-12.
