

Solve your water problems with a Rowater Pro E Series Reverse Osmosis system.

Turn bore water into usable water for homestead, livestock or cropping.

Turn mains water into pure, desalinated water for many different applications.

- Enhance food and beverage production
- Medical applications
- A wide range of agricultural and viticultural applications

Boom sprayers

Improve efficacy of pesticides, counter in-tank antagonism by removing calcium and save on chemical costs.

Livestock

Turn brackish or overly-salty water from dams and bores into clean drinking water for stock. Maximise your potential yield and sale price.

Publicans

Increase patronage with clean water for dishwashing, showers, drinking and gardens by turning bore water into clean water.
