

## TRIAL SITE WALK

# TRIAL SITE WALK

**THURSDAY 12TH OCTOBER**  
Please RSVP to Sam by Monday 9th of October  
via email: [sam@lincolnrural.com.au](mailto:sam@lincolnrural.com.au)  
or phone 0437 235 170

## CUMMINS SUMMER TRADING HOURS

### Dear Valued Customers,

Please note we will be changing our Saturday trading hours at our Cummins Store.

**Our store will be closed on Saturdays from  
4th November 2023 through until April 2024.**

Our Port Lincoln store will continue trading on Saturday mornings, 8.30am-11.30am and are always happy to help you with any enquiries you may have.

**Tel:** Lincoln 8682 2711 Cummins 8676 2003

**Email:** [office@lincolnrural.com.au](mailto:office@lincolnrural.com.au)

**Web:** [lincolnrural.com.au](http://lincolnrural.com.au)

Keep up to date

## TRIAL SITES 2023

This season we have increased the amount of trial work that we typically put in, aimed more at cropping production systems. We put in four different trials this season looking at cereal production: one focusing on pre-emergent chemistry for ryegrass control in wheat, one looking at the effect of plant growth regulators in wheat and barley, one on fungicide efficacy on wheat powdery mildew and lastly a small cereal demonstration of new wheat, barley and oat varieties.

Our pre-emergent site had 33 different chemical mixes, mainly aimed at ryegrass control. We set out at the start wanting to identify what strategies would help us to improve our length of control with ryegrass over the season as well as what chemistries are giving us the best control early. Our untreated control plots in this site showed up nearly 1000 ryegrass plants per metre squared with some of our best treatments getting these numbers down to around 10 plants per metre squared. The site has showed us some valuable information on what products are giving us length of protection versus products that only give around 4-6 weeks control.

Untreated Control

Sakura + Voraxor + Trilur X

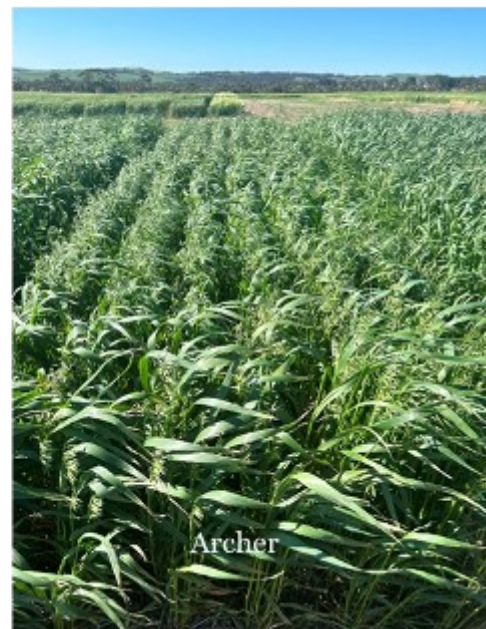

Our fungicide trial has been very informative on the back of last seasons heavy disease pressure. The aim was to identify what fungicide products showed the best efficacy on powdery mildew when applied from GS31 onwards. We applied 24 different treatments to the wheat this season with the stand outs being the new permitted products; Vivando from BASF and Talendo from Corteva, which took our powdery mildew levels from very severe down to basically nothing. There were also some big differences between the mixes early in the season which are quite interesting.

Continued on next page.....

## TRIAL SITES 2023

The demonstration on new cereal variety's coming through has allowed us to have some "hands on" experience with what is coming out. There are multiple new wheats but the standout for me was the new Tomahawk CL wheat from AGT. It looks to be a game changer in yield for a Clearfield wheat variety, bridging the gap between Clearfield and conventional wheats. There are some very high yielding barleys being released for the 2024 season also, with Neo from Intergrain being front of mind. It looks very good in the site, likely to be around 10% higher yield than Planet. We also put in oats this season for the hay growers, Archer and Kingbale from Intergrain look very good for dual purpose oats with the bonus of being Clearfield tolerant varieties. Overland oats from S & W seeds still look very impressive for those that are looking for a grazing or hay only oat.

If you are wanting more detailed information on what has happened out at the site this season please come along to our trial walk on the 12<sup>th</sup> of October from 2pm. There is a lot of valuable information to get out of the day and we would love to have you attend.

**RSVP: By Monday 9th October 2023,  
by calling Sam on 0437 235 170**

## ARE YOU FIRE READY?

### Are you prepared for this fire season?

With the weather starting to heat up now is the time to make sure you are prepared.

SmartBar Fire Fighter units are made to be durable, versatile, and easy to use.

Designed to suit your needs, SmartBar Fire Fighter Units are available in 400L or 600L both with moulded handles, tie down points & a 10L wash bottle.

Built and tested in-store by our team with the 400L units having a 5.5HP single impeller Honda Davey fire pump and the 600L with a 6.5HP twin impeller Honda Davey fire pump.

### 400L

- 1170 x 900 x 950
- UV stable, impact resistant, rust proof poly tank
- 20m x 19mm hose with hanger and adjustable nozzle
- 3-way ball valve for quick suction changeover
- Davey single Impeller pump & 5.5HP Honda motor

### 600L

- 1750 x 900 x 1150
- UV stable, impact resistant, rust proof poly tank
- 36m x 19mm hose with reel and adjustable brass nozzle
- 3-way ball valve for quick suction changeover
- Davey twin impeller pump & 6.5HP Honda motor

## FIRE PROTECTION SPRINKLER SYSTEMS

Lincoln Rural have been designing fire prevention sprinkler systems for over 20 years.

Systems have been designed range from rural to urban properties, large industrial structures to community places of last refuge.

We work closely with clients to develop a system that meets their individual needs. With design options catering for the stay and defend client to the remote start systems for clients that will leave their property.

Contact us for more information on how we can help you protect your property this fire season.

## IS YOUR POOL 'SWIM' READY?

Now winter is over, and the weather is starting to warm up, its time to have a good look at your pool and get it 'Swim-Time Ready!'

There is nothing more annoying than the weather hitting 'swim temp' and the family wants to swim, but on closer inspection, the pool doesn't look that great.....

The most important thing to do is to not leave it until the family want to swim – but look at it now, get your water tested and treat what needs treating and then it will be ready for that first warm burst of Summer.

Often its just a tweak here and there that is needed, and your pool will be good to go.

Let's look at a couple of the most common issues with pools at this time of the year...

1. Chlorine – ensuring your pool has enough chlorine – whether you are dosing yourself or have a chlorinator, now's the time to increase the dose of chlorine so the pool is adequately sanitised & safe for swimming.

2. Cloudy water – this can be caused by a number of things including a) high pH - a water test will confirm this & adding hydrochloric acid will reduce that; b)algae – a large dose of liquid chlorine or an algaecide will kill algae which will then need to be vacuumed out; c) insufficient filtration time – we usually reduce the filtration time over winter as there is no pool use - increasing the run time will help filter out particles which contribute to cloudy water. Once the water is well balanced, having taken care of these reasons, you should use a clarifier or flocculent. These will combine the very fine particles into larger ones which can then be trapped in the filter system, and this will then help get your water sparkling again.

Remember, continued & regular maintenance combined with having your water tested here at Lincoln Rural is the best way to keep your pool or spa in tip top shape & 'Swim-Time Ready!'

***We look forward to seeing you in store soon!***

## CUMMINS STORE

**DID YOU KNOW THAT DOGS AND CATS SWEAT FROM THEIR PAWS? AND DID YOU KNOW THE CUMMINS STORE STOCKS ALL SORTS OF PET FOODS AND ANIMAL CARE PRODUCTS?**

We have food for your dog, cat, chickens and your horses!

We also carry milk replacer for calves, lambs and kids, worming treatments for cats, dogs and horses.

Dog beds, collars and drinking balls and troughs.

We even have houses for your canine friend and the perfect treat for your peckers.

So don't sweat it, chances are we have what you need for your pet at Lincoln Rural, Cummins.

## ADLER SINGLE BARREL 410GA

Adler's single barrel 410Ga is a modern take on the classic poachers gun that has been popular since the late 1800's. No farm would be complete without a classic 410 single barrel for small vermin and pest control.

Featuring hard wearing synthetic stocks and a trigger guard action release this gun also conveniently folds back on itself for easy storage.

It also features, a manual hammer cock, 3 inch chamber, 26" barrel with fixed full choke and sling swivels. The quality of the fit and finish is excellent for a gun in this price range. Definitely a step up in quality from your average 410Ga 'snake gun'.

Features:

- 410 Gauge 3" chamber
- 26" barrel
- Fixed full choke
- Manual hammer cocking
- Trigger guard action release
- Synthetic stocks
- Folding design
- Decorative engraving
- Sling swivels
- 5 year warranty

## Snake Protection

With the weather warming up there have already been plenty of snakes being found around the EP. We are here to help keep you protected this summer.

### RAIDAR SNAKE DEFENCE TWIN PACK

Snake defence humanely repels snakes from your property by emitting sound and a pulsing vibration through the ground every 50 seconds. A snake will sense these vibrations as danger and avoid the area.

Safe to use around children, pets, birds or livestock and they are portable so you can use them when camping, on picnics or even at the holidays house.

The solar panel and rechargeable accumulator battery collects power by day for operation at night. When the battery is fully charged it can supply enough power for around-the-clock operation even on dull days.

The repeller radiates in all directions (full 360 deg) up to a maximum of 15 meters radius or 30m diameter (about 700sqm). For best use it is recommended to use 2 or more units no more than 25meters apart.

### SNAKE PROTEX EXTREME GAITERS

SnakeProtex™ durable snake gaiters are scientifically proven to protect the wearer from the world's most venomous snakes. Developed in Australia to stay snake safe in the great Australian outdoors.

Why is SnakeProtex™ Extreme So Good?

Designed from the outset for protection from Australian snakes, SnakeProtex is rigorously tested. The gaiter also needs to be tough enough for the harsh Australian environment and everyday use.

The new Extreme model sports a range features, including:

- adjustable boot strap to fit a wide range of work boots
- adjustable Velcro top leg straps allowing for a firmer, closer and safer fit
- a press tab cover over the zipper provides better security stopping the zip from moving
- tough 900 weight denier outer for better resistance to everyday wear and tear. This fabric tends to be water repellent too!
- neutral black fabric & fastener construction looks great with everyday workwear
- thick inner layers offer peace-of-mind protection. As a simple test, try pushing a drawing pin through our gaiter – many others fail this simple test!
- a robust internal stiffener behind the zip ensures the gaiter does not sag. This stiffener overlaps the zip construction so the zip itself is not a 'weak spot' – in fact; the zip area is even tougher.
- a 1 year manufacturer's warranty against defects
